## 1 Assumptions

- **Linearity**: The independent variables  $X_1, \ldots, X_m$  are linearly related to the logit of the probability that Y = 1 or, equivalently, the log-odds that Y = 1.
- Independence of Errors: The observations  $y_1, \ldots, y_n$  are independent of one another.
- **Distribution of Errors**: Each observation  $y_i$  follows a Bernoulli distribution with probability of success  $p_i$ .
- Independence of Independent Variables: The independent variables  $X_1, \ldots, X_m$  are independent of one another.

## 2 Derivation

$$p_{i} = \mathbb{P}(Y = 1)$$

$$\Rightarrow p_{i} = \frac{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}{1 + e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}$$

$$\Rightarrow \frac{1}{p_{i}} = \frac{1}{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}{\frac{1}{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}}$$

$$\Rightarrow \frac{1}{p_{i}} = \frac{1}{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}} + \frac{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}{\frac{1}{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}} + 1$$

$$\Rightarrow \frac{1}{p_{i}} = \frac{1}{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}} + 1$$

$$\Rightarrow \frac{1}{p_{i}} - 1 = \frac{1}{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}$$

$$\Rightarrow \frac{1 - p_{i}}{p_{i}} = \frac{1}{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}$$

$$\Rightarrow \frac{p_{i}}{1 - p_{i}} = \frac{e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}}{1}$$

$$\Rightarrow \frac{p_{i}}{1 - p_{i}} = e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}$$

$$\Rightarrow \ln\left(\frac{p_{i}}{1 - p_{i}}\right) = \ln\left(e^{\beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}}\right)$$

$$\Rightarrow \log p_{i}(p_{i}) = \beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}$$

$$\Rightarrow \log p_{i}(p_{i}) = \beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}$$

$$\Rightarrow \log p_{i}(p_{i}) = \beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}$$

$$\Rightarrow \log p_{i}(p_{i}) = \beta_{0} + \beta_{1}X_{1} + \dots + \beta_{m}X_{m}$$
